NGUYỄN SỸ MẠNH CƯỜNG

Flutter Mobile Developer

0332891741 | nguyencuong2112bghg@gmail.com | Ha Noi
21/12/2003 | github.com/ScrotJame

PROFESSIONAL SUMMARY

Flutter mobile developer with over one year of hands-on experience developing and maintaining applications, using Dart, BLoC/Cubit and Clean Architecture. Experienced in RESTful API integration, responsive Android/iOS interfaces, bug fixing and native platform integration. Familiar with Flutter DevTools for debugging and performance profiling, and Git/GitLab collaboration through pull requests and code review in Agile/Scrum teams. Holds a bachelor's degree in Information Technology and can read English technical documentation. Currently participating in VinUni's AI in Action and interning at VSF.

TECHNICAL SKILLS

Flutter & State	Dart/Flutter (Advanced); BLoC; Cubit; reactive UI updates
Architecture	Clean Architecture; Repository Pattern; Domain/Data/Presentation separation
APIs & Data	RESTful APIs; JSON/HTTP; Postman; Firebase; WebSocket; Drift/SQLite; PostgreSQL; Supabase Auth
Debugging & UI	Flutter DevTools; debugging and troubleshooting; performance profiling; Figma-to-Flutter UI; responsive layouts; Material Design; Cupertino
Native Integration	Flutter Platform Channels/MethodChannel; Java/Kotlin (Basic); Android AlarmManager; BroadcastReceiver; NotificationCompat; deep linking
Teamwork & Tools	Git; GitLab/GitHub; Git Flow; pull requests; code review; Jira; Agile/Scrum; Android Studio; VS Code; Cursor
Additional Development	React/Vite; JavaScript, HTML/CSS; PHP/Laravel; FastAPI; SQLAlchemy; C#/Unity

WORK EXPERIENCE

VSF 09/2026 - Present

Intern - Front-end & Functional Module Development

- Contributing to front-end development and the implementation of functional modules.
- Internship through VinUni's AI in Action, starting mid-September 2026; expected completion in October 2026.

IHOUZZ TECHNOLOGY JOINT STOCK COMPANY 10/2025 - Present

Flutter Mobile Developer

- Developed and maintained Flutter applications.
- Collaborated with the engineering team using GitLab pull requests and code review.
- Worked in Agile/Scrum with Jira for task tracking; used Cursor to support coding tasks.

Enspire Digital 06/2025 - 07/2025

Mobile Game Developer

- Maintained and upgraded Flutter applications, implementing new features based on the product roadmap.
- Updated UI layouts and fixed bugs to improve application stability and user experience.
- Integrated native iOS modules with Unity through Flutter Platform Channels for two-way data synchronization.

IMSOFT 24/02/2025 - 25/04/2025

Game Developer Intern

- Completed Flappy Bird and Gold Miner in Unity/C# to specifications and deadlines, including AdMob banner and rewarded video integration.

DEVMASTER 16/12/2024 - 20/01/2025

Web Developer Intern

- Developed UI/UX for an internal payroll management system using Laravel/PHP for small and medium-sized businesses.
- Integrated HR, payroll and reporting modules while coordinating a team of 3-5 members.

SELECTED PROJECTS

Dungeonary - Vocabulary Learning App 04/2026 - Present

Flutter Personal Project | github.com/ScrotJame/App_1

- Applied Clean Architecture with separate Domain, Data and Presentation layers, BLoC/Cubit state management and the Repository Pattern for testability and flexible data source replacement.
- Designed a local-first Drift/SQLite database with 10+ relational tables, foreign keys and cascading deletes to ensure data integrity.
- Integrated Flutter with native Android through MethodChannel, Kotlin AlarmManager and BroadcastReceiver to schedule review notifications, including Doze Mode support.
- Implemented Fluro routing, spaced repetition and a pet/plant evolution system to support vocabulary learning.

Rentify - Rental Management Application 02/2025 - On hold

Personal Project | github.com/ScrotJame/Rentify

- Built a cross-platform Android/iOS rental management application using Clean Architecture with separate Domain, Data and Presentation layers.
- Used BLoC/Cubit for rooms, contracts and invoices, with real-time UI updates without manual refresh.
- Designed relational database schemas and Laravel RESTful APIs with authentication and data validation.
- Implemented digital invoices, electronic contracts and payment reminder notifications.

Car X EV Multi-Channel Support Platform 07/2026 - 09/2026

Full-Stack Engineer

- Built three React/Vite portals for customer support using Redux Toolkit and React Query; implemented real-time chat updates through WebSocket and streaming AI responses via NDJSON.
- Developed FastAPI services and a 24-table PostgreSQL schema with async SQLAlchemy for appointments, vehicle lookup and support tickets.
- Integrated AI tools with backend workflows, fixed intent classifier bugs and implemented AI-to-human handoff within the staff inbox.

EDUCATION & TRAINING

Phuong Dong University 2021 - 2025

Bachelor’s Degree in Information Technology

VinUni - AI in Action In progress

Participant

Currently participating in AI in Action, with an industry internship placement at VSF.

CERTIFICATION

Google Data Analytics Professional Certificate 2024

Google / Coursera

ADDITIONAL INFORMATION

English: Able to read technical documentation and communicate at a basic level.
Professional strengths: Logical thinking, technical problem-solving, teamwork, attention to implementation details and a commitment to continuous learning.
Japanese: Currently learning; target JLPT N4.
